

Portões

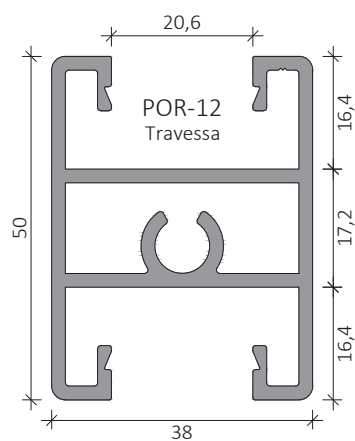

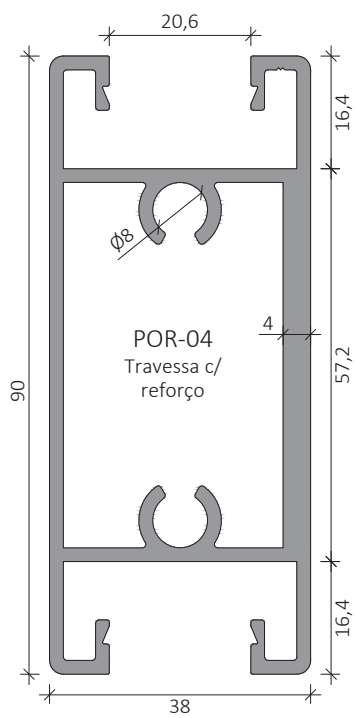

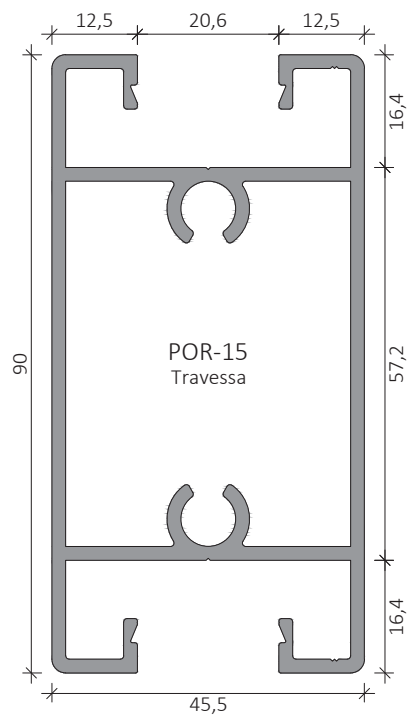

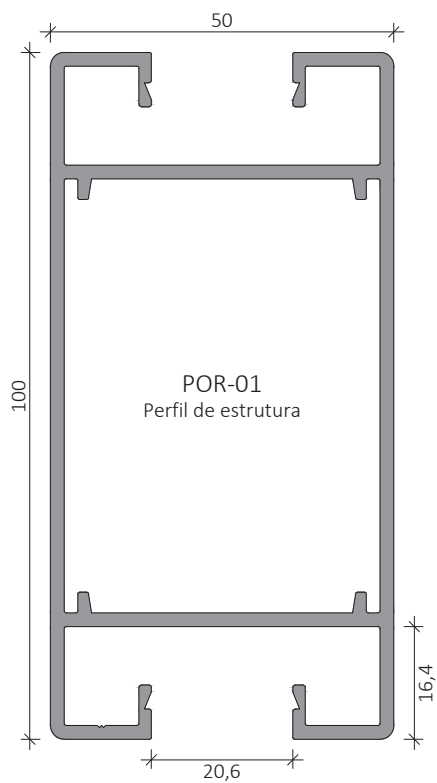

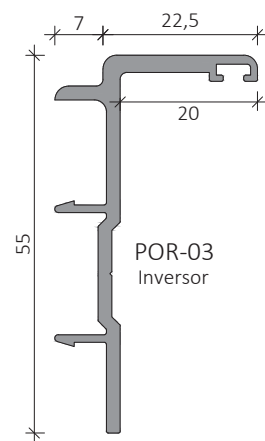

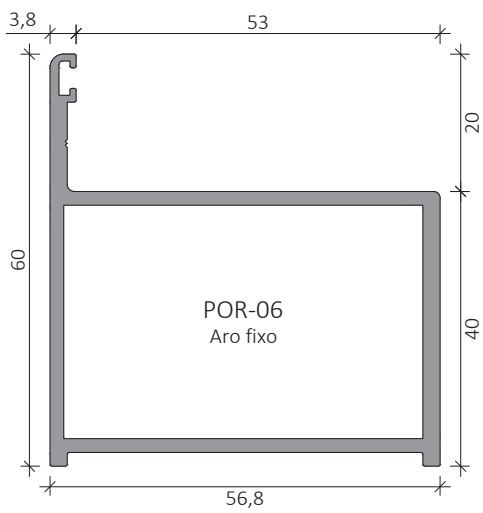

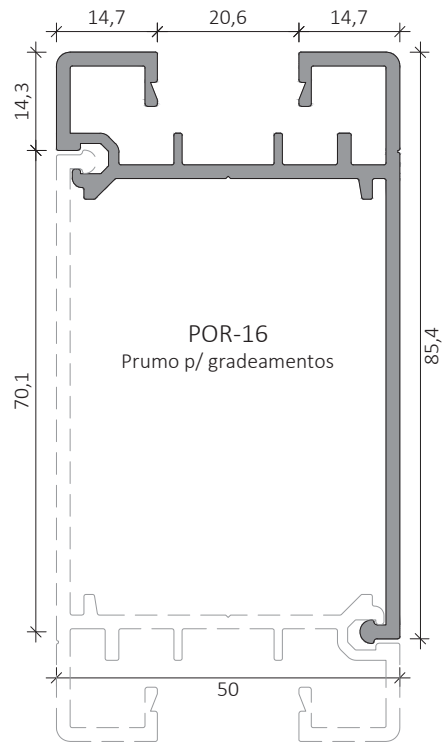

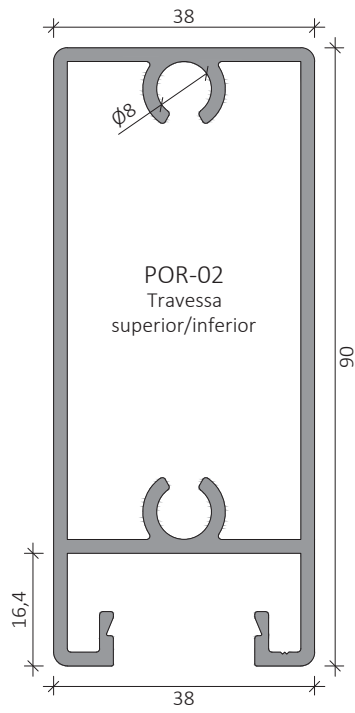

Sistema de Portões

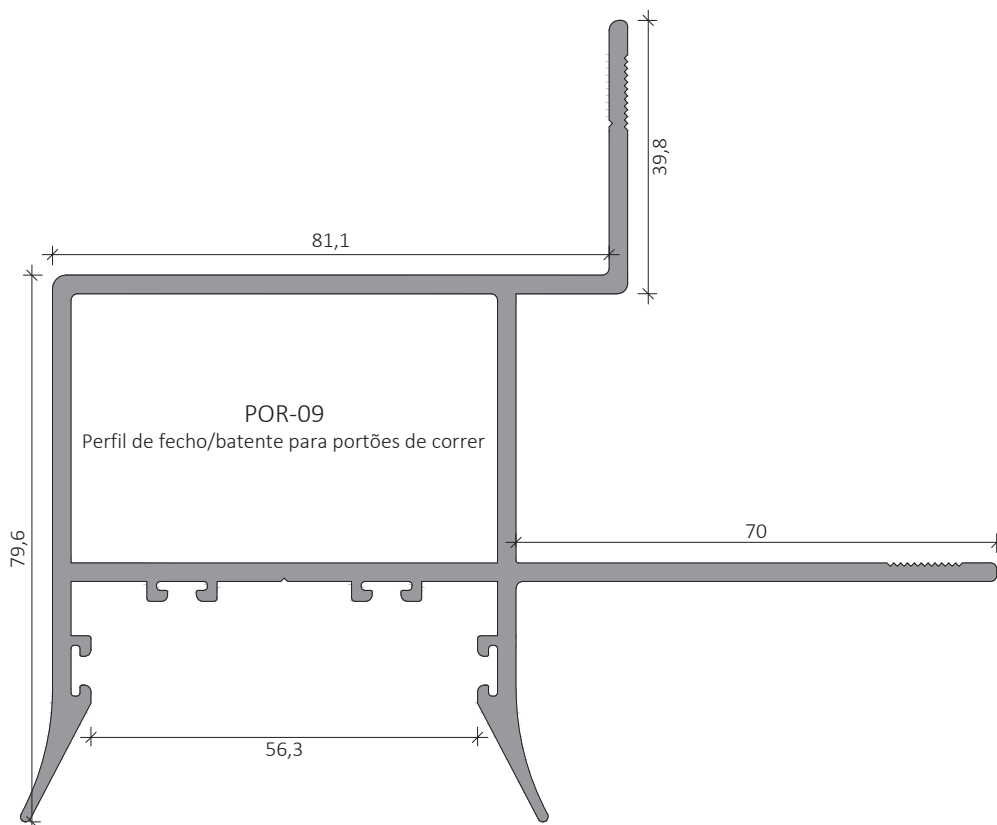

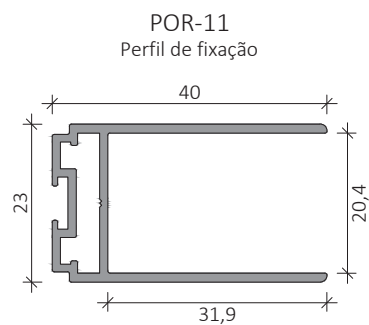

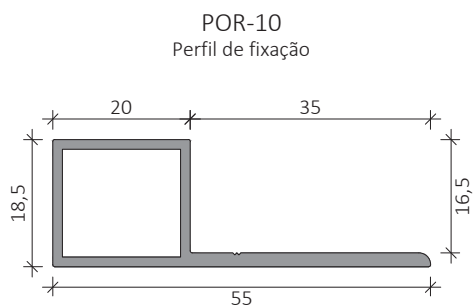

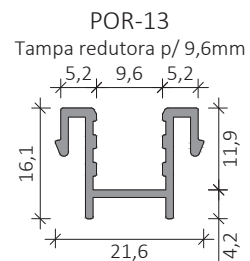

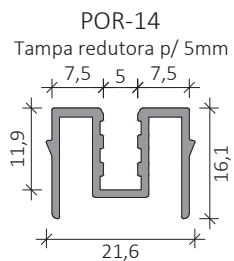

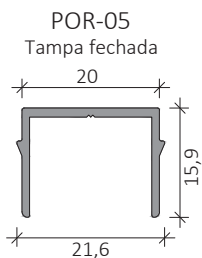

O sistema de portões de jardim POR, permite criar portões de correr e batente de uma e duas folhas. Na opção de batente, os portões possibilitam a aplicação um aro fixo, permitindo assim uma maior vedação visual.

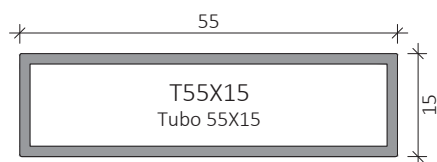

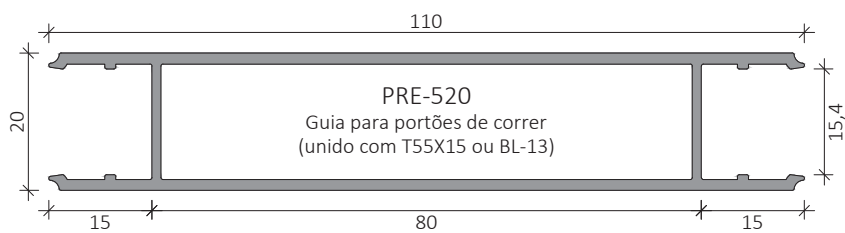

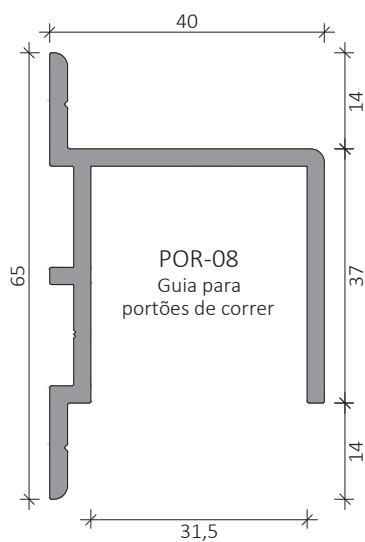

A vasta gama de perfis que incorporam o portfólio desta série, permitem criar inúmeras tipologias, com várias possibilidades de enchimento.

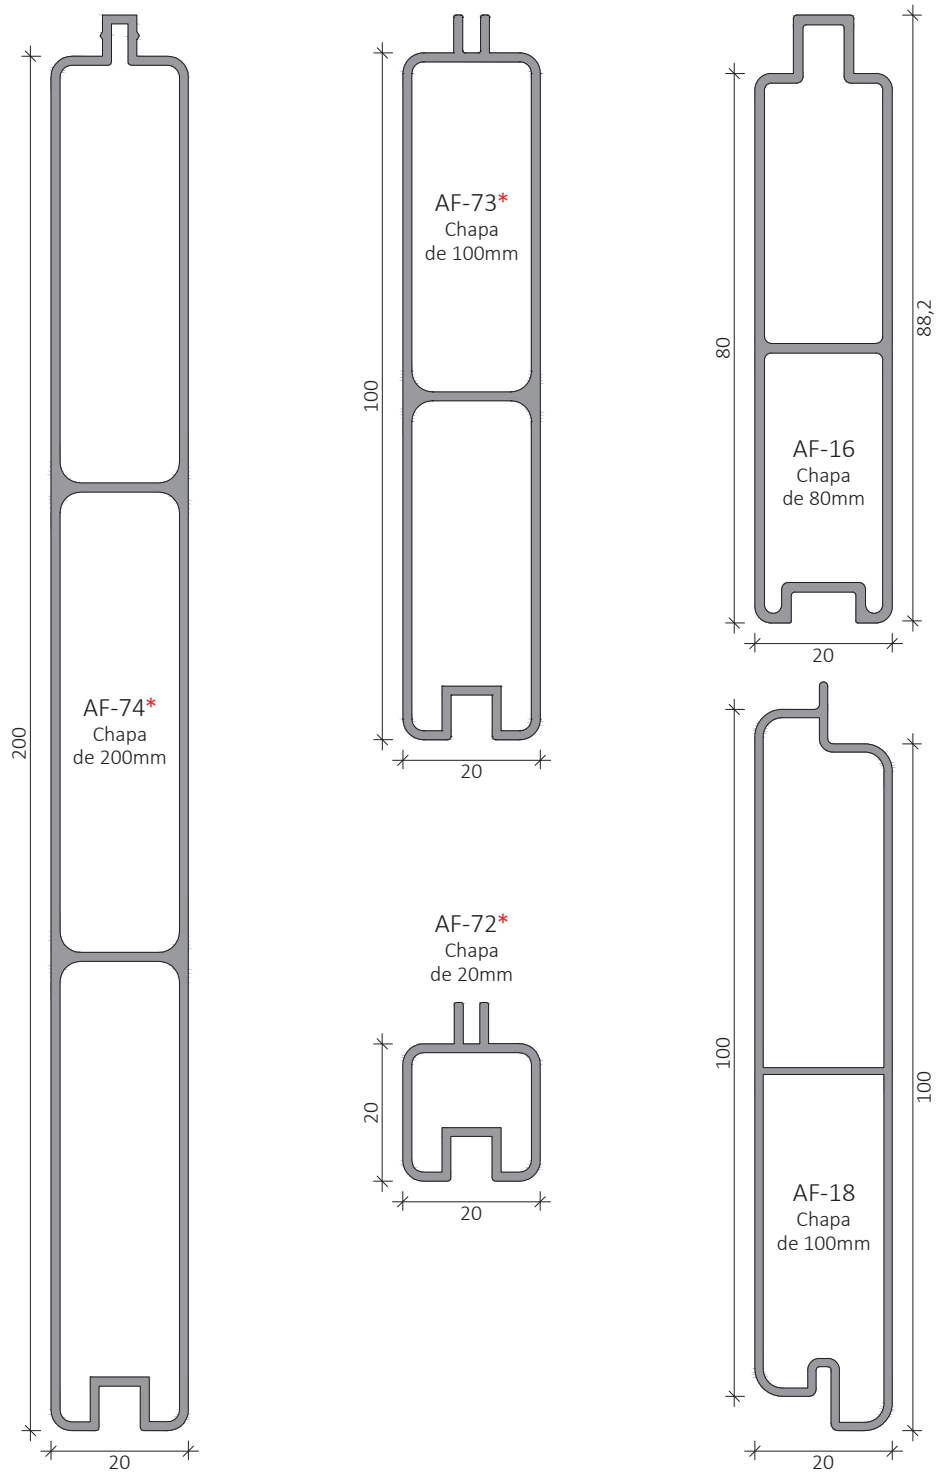

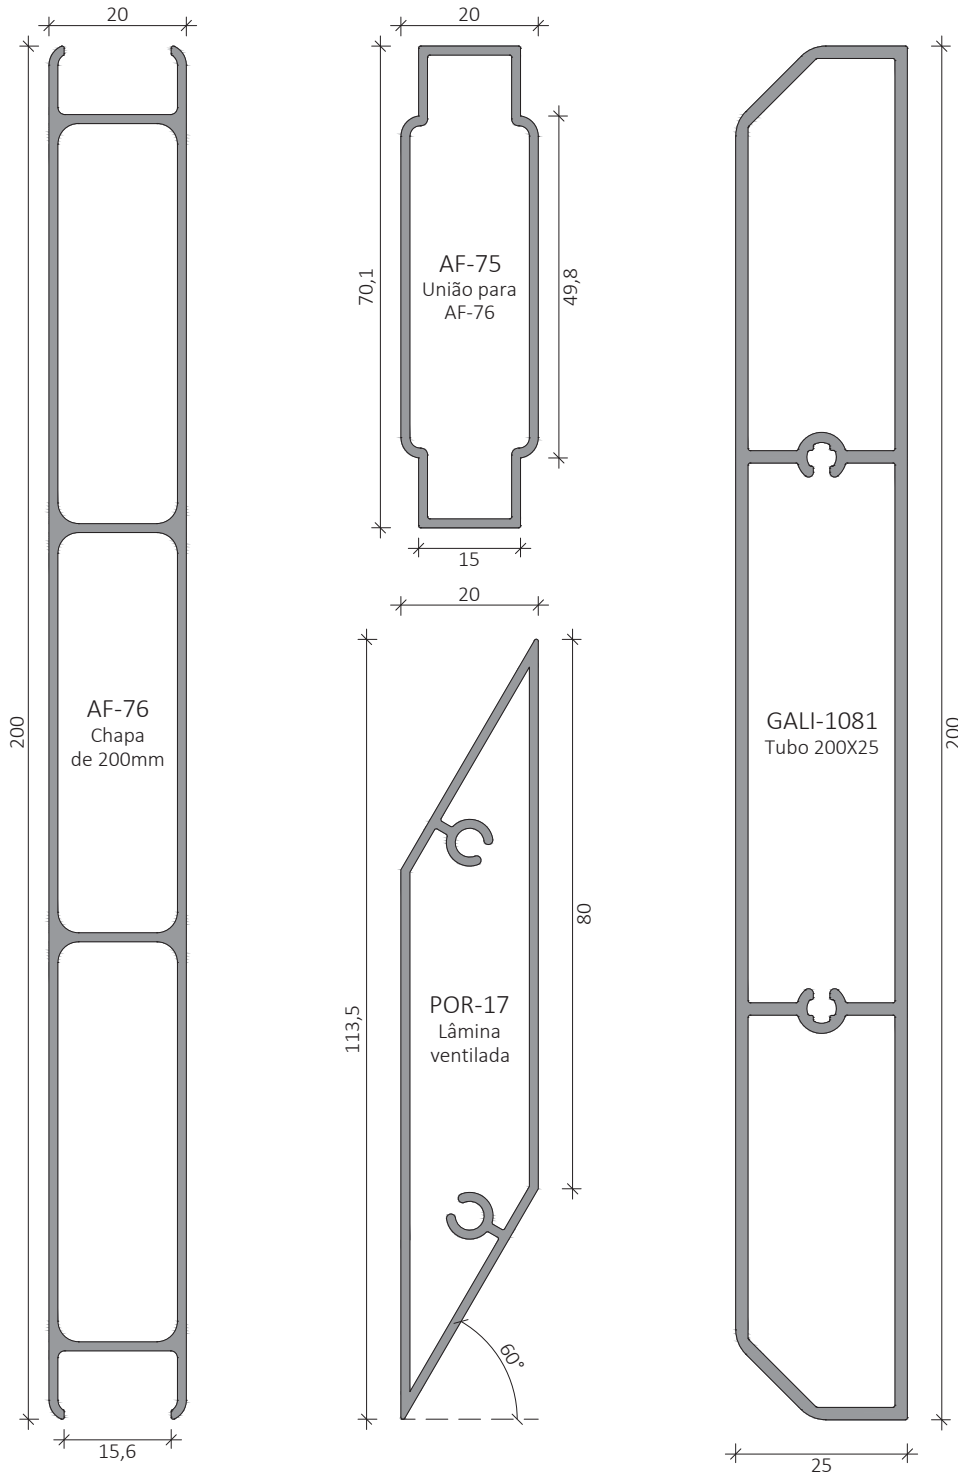

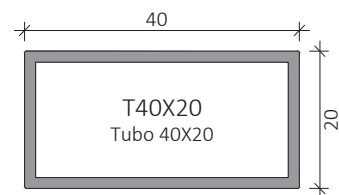

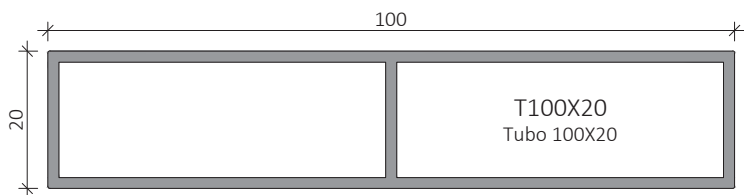

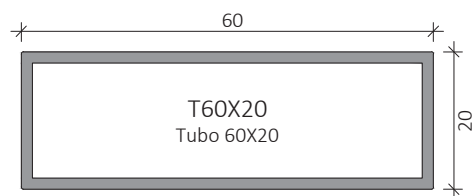

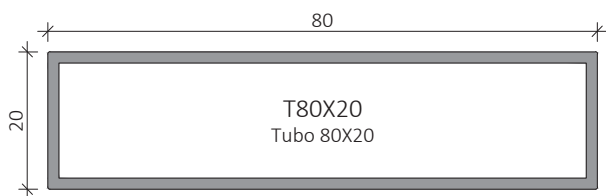

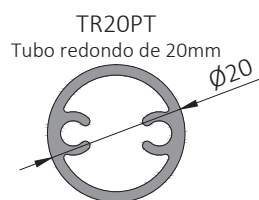

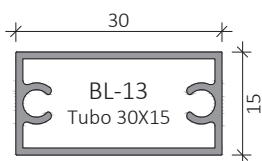

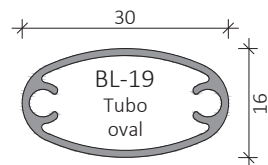

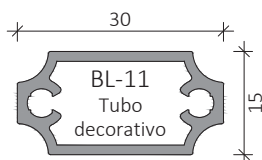

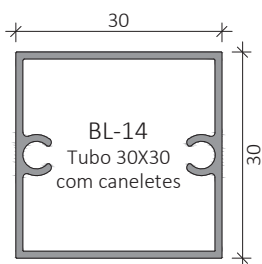

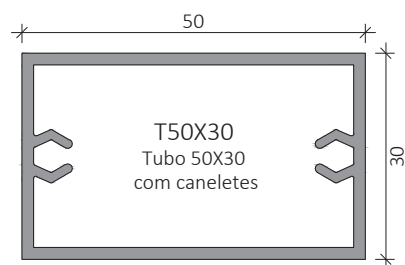

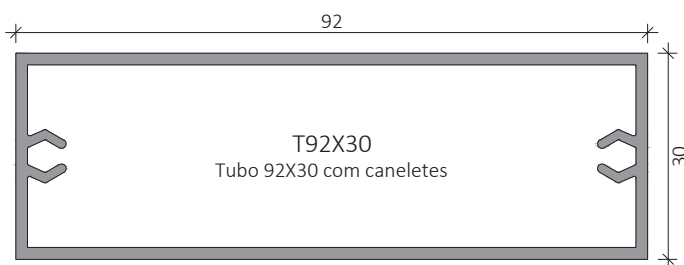

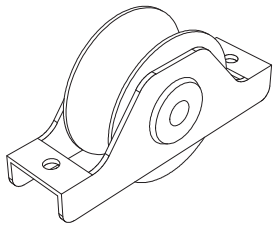

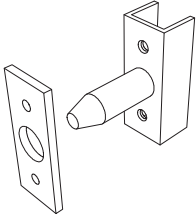

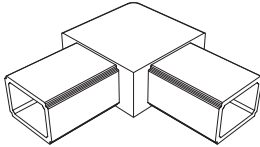

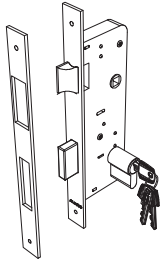

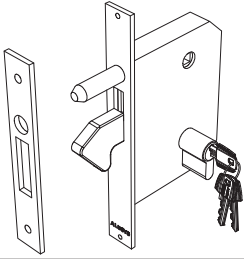

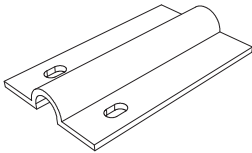

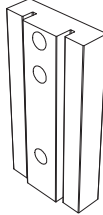

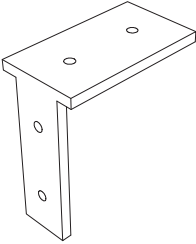

* Chapas com encaixe compatível entre si.
